

New York-Israel R&D and Commercialization Partnership in Nanoscale Technologies

The Israeli Industry Center for R&D (MATIMOP), on behalf of the Office of the Chief Scientist (OCS) in the Ministry of Industry Trade and Labor, the College of Nanoscale Science and Engineering (CNSE) in Albany, New York, and Israel National Nanotechnology Initiative (INNI) jointly announce the launch of a new research and development (R&D) and commercialization partnership in Nano-scale technologies.

The new initiative, which will be officially launched in January 2013, offers access to CNSE's resources, services and know-how and enhances collaboration with US and international entities that operate within CNSE in the following fields:

Sub systems, sensors and accessories

Simulation, modeling tools and methodologies

CMOS nano-level design tools, methods and testing

According to the CNSE-MATIMOP implementation agreement, Israeli companies may qualify for financial support through the underlying OCS funding schemes.

MATIMOP and INNI will provide support and guidance in solidifying the R&D and commercialization activities at CNSE, and in providing partner matching assistance and an extensive overview of the various collaboration tracks and funding mechanisms available in the framework of this new program.

An Information Day, which will include pre-scheduled meetings with CNSE representatives, will be offered to the Israeli public in January 2013.
